

# Brent Elementary School, Washington DC

---

## Ground Level, 10,000 Square Feet

Approximately 10,000 Square Feet of Classrooms and Offices. This particular location had elevation problems due to the a recent addition that was made to the school by removing and placing new walls. The transition areas became high points and would be unsuitable for VCT to be installed. We were able to fix these problems in only a few hours ensuring the school would be ready to open their doors for the upcoming school year.
